

Human-Centered AI To-Do App

Human-Centered AI To-Do App

Project Overview

The Human-Centered AI To-Do App is a mobile application designed to help students organize their daily tasks and improve productivity. The application uses simple AI-powered suggestions to guide users in prioritizing tasks and maintaining consistency in their study routine.

Problem Statement

Many students struggle to manage their daily tasks, assignments, and study schedules effectively. They often feel overwhelmed and miss important deadlines due to poor task organization.

Solution

To solve this problem, I designed a simple AI-powered To-Do application that helps users:

- Manage daily tasks
- Track progress
- Receive helpful AI suggestions
- Improve productivity through better planning

Target Users

- College Students
- School Students
- Learners preparing for examinations
- Users looking for a simple productivity tool

Features

1. Task Management

Users can create and organize their daily tasks.

2. AI Suggestions

The application provides simple productivity recommendations based on user activities.

3. Progress Tracking

Users can monitor completed tasks and overall productivity progress.

4. User-Friendly Interface

The application follows a clean and simple design to ensure ease of use.

Human-Centered AI Principles Used

Transparency

AI suggestions are displayed clearly and are easy to understand.

User Control

Users decide which tasks to create, edit, or complete.

Simplicity

The interface is designed to reduce confusion and improve usability.

Accessibility

Readable typography, consistent spacing, and clean navigation improve the user experience.

Design Process

1. Understanding the problem
2. Defining user needs
3. Creating wireframes
4. Designing high-fidelity screens
5. Creating a prototype
6. Reviewing and improving the design

Screens Designed

1. Splash Screen
2. Login Screen
3. Home Dashboard
4. AI Suggestions Screen
5. Progress Screen

Tools Used

- Figma
- Pinterest

Learning Outcomes

Through this project, I learned:

- UI/UX design fundamentals
- Wireframing
- Mobile interface design
- Prototyping in Figma
- Human-Centered AI design principles

- ☐ Complete Maths Assignment :
- ☒ Revise Physics Chapter 5 :
- ☐ Chemistry Notes :

AI Suggestions

Based on your tasks and study pattern

Revise Physics Chapter 5 in the evening
You perform better at this time.

Take a 15 min break
You've been studying for a while.

AI Suggestions

Smart suggestions to help you study better and stay productive.

Focus on One Goal

Concentrate on one important task at a time. It improves focus and helps you finish faster.

Prioritize High Tasks

You have some high priority tasks pending. Complete them first for better results.

Take Short Breaks

Taking a 10-15 min break after 45 min of study helps your brain relax and remember more.

Conclusion

The Human-Centered AI To-Do App demonstrates how AI can support students in managing tasks and improving productivity through a simple and user-friendly experience.
